

Fibrous product contg. detergent for washing the body - comprises paste of detergent, thickener, alcohol and opt. perfume etc., printed on fabric  
C90-159490

A fibrous product with a body shampoo is obtained by a method in which an aqueous printing paste composed of a detergent for body shampoo, e.g., lauryl ether-sodium sulfate, etc., a glue such as CMC, sodium alginate, etc., and a volatile alcohol such as ethyl alcohol, together with a perfume, a pigment, etc., as needed, is printed in a pattern on the surface of a fibrous product, e.g., woven or nonwoven or knitted fabrics of natural or synthetic fibres, etc., and dried.

The aqueous printing paste is composed of e.g. 500 pts.wt. 20% lauryl ether sodium sulfate, 100 pts.wt. 4% P.O.E. eleyl ether (17 moles EO added), 500 pts.wt. 7% CMC, 90 pts.wt. water, and 10 pts.wt. ethyl alcohol.

USE/ADVANTAGE - The fibrous product containing body shampoo is excellent in appearance and texture and can effectively and simply wash human body only by wetting it with water. (5pp Dwg.No.0/0)
